

## **STEREX ADVANCED COSMETIC PROCEDURES**

### **AFTERCARE**

- Keep the treated area clean and dry
- Apply Sun Protection SPF50 to the area treated to prevent pigmentations
- Apply Aloe Vera or a cool compress (not ice) to soothe the area if needed
- Allow up to 2 weeks for complete healing to take place
- Do not pick at the treated area, if a crust forms allow to fall off naturally to prevent scarring to the area
- Avoid active ingredients i.e., acids, vitamin A, vitamin C to treated area until completely healed
- Avoid hot showers, baths, steam rooms, saunas, sun exposure to the treated area
- Sometimes with lesions a further treatment may be required following healing of the treated area
- There is a small risk of minor pigmentations/tissue damage following treatment which may or may not prove permanent
- Ensure clothes do not rub against the treated area
- If you touch the treated area, ensure your hands and fingertips are clean
